IRLANDE

Maths on the move: The aim of ACTS Networking (Archives for Curriculum Training and Support) is to support teachers, students and parents using new technologies in mathematics related issues. National and transnational mathematics quiz via the net for 12-13 year old students.

contact: Sean Ashe (National Archive for Mathematics Education, URL: <http://www.indigo.ie/name>)

EdNet: Drafting of a "Classroom of the Future" guidebook for European schools in order to introduce them to the possibilities of the Internet.

contact: Michael Hallissy/John Hurrley (tel: +353 45 861730)

LearNet Netd@ys Europe series: A series of 10 live television programmes transmitted on RTE (the Irish national broadcaster), targeted at learners, teachers and parents. LearNet will be transmitted weekly on Saturday mornings at 12.00 midday beginning October 11th through to December 13th. The objective is to provide a platform and a catalyst for bringing the European and the global dimension of schools and the Internet to the education community, demonstrating examples of best practice and excellence.

contact: Leo Casey (tel.: +353.1.7068701, fax: +353.1.7067912)

ITALY/ITALIE

Internetscuola: Netd@ys Italia 1997: National project aiming at making the Internet reach out to every school thus opening an on-line link between Italy's scientific community and the schools in view of setting-up an effective information tool which would boost the spreading of a thorough scientific and historical-scientific culture.

contact: Carmine Marinucci (fax: +39 6 3627 2930, e-mail: marinucci@esedgt.sede.enea.it, URL: <http://www.enea.it/internetscuola>)

Kidlinks: Project submitted by the Municipality of Bologna in order to put students in touch with students in the rest of the world by means of modern technology. Based on the present network "Kidlinks", grouping 40 schools, it aims at developing educational activities and extend the network to additional schools.

contact: Roberto Generali (fax: +39 51 397306, URL: <http://kidslink.bo.car.it/netd@ys>)

Comune di Siena: Experimental project aiming at using computers and new technologies to achieve a common educational goal with other European students. The topic of the project is to study human and natural environment as represented through music, poetry and visual arts, to promote a cross comparison of national histories and to create a model of an ideal city using different perspectives.
